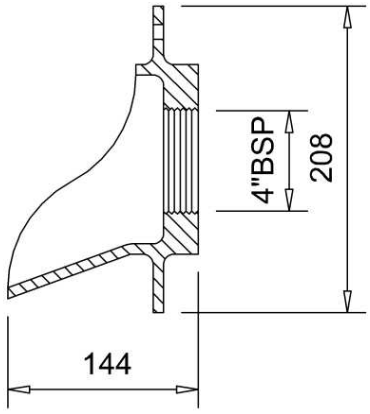
Product Specification



Name
Frost Downspout Nozzle horizontal outlet BSP4

Code
33.0444

Description
Frost downspout nozzle with threaded outlet BSP4

Gun Metal BS EN 1982:1999 CC491K

Body Material
Gunmetal

Body Type
N/A

Grating Material
N/A

Flow Rate
N/A

Outlet Type
THREADED

Load Rating
N/A

Threaded Joint Instructions

Apply Low Modulus Silicone to the thread of the pipe spigot & female thread within the roof outlet body. Using a flat spreading utensil, evenly spread the silicone into the threaded grooves. Insert the male into the female thread of the roof outlet body then carefully turn clockwise ensuring the thread is not "cross threading". Once fully tightened clean off excess silicone to both ends of the threaded connection.
